

One of the largest international trade electronic libraries, [Exportgate](#), with access to trade information for Romania and in total for over 180 countries offers to Greek and Cypriot businesses access to advanced tools and special information resources so they may boost their business operations. They have access to macroeconomic, commercial, and statistical reports every week and they can search in one place all import and export opportunities.

Exportgate, which is available to all companies and with the participation of over 5,300 Greek companies, covers all the dynamic export sectors of the country. They are able to find data on more than 1 million partners located in 200 countries.

In addition, Exportgate members have the opportunity to have the opportunity to enter Trade Club Alliance, the first Global Digital Networking Platform supported by 12 Major International Banks in more than 40 countries.

We connect Greek companies with potential associates from around the globe, using modern networking tools, artificial intelligence (AI) and machine learning technology.
